

About JETGO

From humble beginnings, JETGO Australia has grown substantially in the past 5 years. Transforming from a small charter company into the thriving commercial operator it is today. JETGO Australia Holdings Pty Ltd is a privately owned Australian company that offers a unique portfolio of aviation services as Australia's premium regional jet operator; connecting people directly to their preferred destinations.

“These aircraft have the smallest environmental footprint of its class, with low fuel consumption and carbon emissions.”

JETGO exclusively operates Embraer Regional Jets (ERJ) manufactured by Embraer SA of Brazil - the world's leading supplier of regional jet aircraft. These aircraft have the smallest environmental footprint of its class, with low fuel consumption and carbon emissions.

The ERJs are extremely reliable technologically advanced aircraft designed to withstand the rigours of high utilisation airline operations. The ERJs have a phenomenal safety record with the worldwide fleet having accumulated over 25 million flight hours without a single major accident. These 37, 44 and 50 seat aircraft are currently servicing our 10 destinations throughout the east coast of Australia as well as our on-demand jet charter, or ad hoc air charter, for corporate, resource, government and private customers both within Australia and worldwide. We also operate scheduled FIFO services for leading mining and energy company's staff and contractors to and from remote sites.

Our staff and crew are dedicated to providing the highest level of customer service at all times and we pride ourselves on the JETGO inflight experience. Our entire team are a very experienced group from various fields within the global aviation community; sharing their backgrounds from all over the world.

Quite Frankly Natural is the result of Founder Samantha Marsh's youthful obsession with luxury brands and her adult-acquired education into natural health.

Combining – at no cost spared – the finest available natural ingredients with the most advanced developments in botanical chemistry, Quite Frankly Natural pushes the boundaries of natural beauty beyond past limitations.

Packaged in décor-enhancing bottles, Quite Frankly Natural promises to elevate the conscious consumers' bathroom experience to new heights with its eco-luxe range of skin care, hair care and mineral makeup.

Quite frankly, there's no other brand like it.

- organic
- australian made
- vegan
- not tested on animals
